STORM OF RAGNAROK – CARD RULINGS
Compiled as of February 2, 2011 - <version 1.0>

**Cosmic Compass**
STOR-EN001
*When this card is Normal Summoned, you can Special Summon a number of “Compass Tokens” (Machine-Type/EARTH/Level 1/ATK 0/DEF 0) up to the number of monsters your opponent controls.*

If you choose to activate this effect you must Summon at least 1 Token.

You don’t have to choose the number of Tokens you want to Summon until the effect resolves.

You don’t count your opponent’s monsters until the effect resolves.

If a **Compass Token** is affected by **Limiter Removal** it will be destroyed during the End Phase even if its ATK stayed at 0.

**Doppelwarrior**
STOR-EN002
*When a monster is Special Summoned from your Graveyard, you can Special Summon this card from your hand. If this card is sent to the Graveyard as a Synchro Material Monster, you can Special Summon 2 "Doppel Tokens" (Warrior-Type/DARK/Level 1/ATK 400/DEF 400) in Attack Position.*

You cannot activate the effect to Special Summon this card from your hand during the Damage Step.

You can activate the effect to Special Summon this card from your hand during either player’s turn.

You can only activate 1 **Doppelwarrior**’s effect when a monster is Special Summoned from your Graveyard even if you have more than 1 **Doppelwarrior** in your hand.

You can Special Summon **Doppelwarrior** from your hand when your opponent Special Summons a monster from your Graveyard to their side of the field with **Monster Reborn**.

You cannot activate the effect to Summon **Doppel Tokens** if you do not have at least 2 open Monster Card Zones.
You cannot choose to Summon only 1 or 0 **Doppel Tokens**. You must Summon 2 if you activate the effect.

If you use multiple **Doppelwarriors** as Synchro Material Monsters you can activate both of their effects.

The owner of **Doppelwarrior** is the player who can activate its effect, even if the opponent uses it as a Synchro Material Monster due to **Synchro Material**.

The effect to Special Summon **Doppel Tokens** activates in the Graveyard, so you can activate it even if **Doppelwarrior**’s effect is being negated by **Junk Synchron**.

---

**Stardust Phantom**  
**STOR-EN003**  
*When this card you control is destroyed by your opponent's card (either by battle or by card effect) and sent to your Graveyard, you can select 1 "Stardust Dragon" in your Graveyard and Special Summon it in face-up Defense Position. You can remove from play this card in the Graveyard to select 1 face-up Dragon-Type Synchro Monster you control. Once per turn, that Synchro Monster cannot be destroyed by battle, but each time this effect is applied, it loses 800 ATK and DEF at the end of the Damage Step.*

The effect to Special Summon **Stardust Dragon** targets. It can be activated during the Damage Step.

If **Stardust Phantom** is destroyed while face-down, you can activate its effect.

This effect cannot Special Summon a **Stardust Dragon** that was Summoned by **Starlight Road**.

If **Stardust Phantom** is destroyed because your opponent tries to take control of it with a card effect but has no open Monster Card Zones, you cannot activate the effect to Special Summon **Stardust Dragon**.

If your **Stardust Phantom** is equipped to one of your monsters by an effect and is destroyed and sent to the Graveyard by an opponent’s card, you CAN activate its effect.

If **Stardust Dragon** and **Stardust Phantom** are destroyed at the same time, you can activate **Stardust Phantom**’s effect and Special Summon that same **Stardust Dragon**.

Removing **Stardust Phantom** from play is a cost to activate its second effect.

The second effect of **Stardust Phantom** targets the face-up Dragon-Type Synchro Monster. It cannot be activated during the Damage Step.

If the target face-up Dragon-Type Synchro Monster is flipped face-down, or removed from the field, the effect will not apply even if it is flipped face-up again or returns to the field.

You cannot target the same Dragon-Type Synchro Monster with more than 1 **Stardust Phantom**’s effect.

Protecting the Synchro Monster from battle and reducing its ATK and DEF does not start a Chain.

The protection granted by **Stardust Phantom**’s effect along with the ATK and DEF decreases last as long as the targeted monster is face-up on the field.

The targeted monster does not need to have at least 800 ATK or DEF to be protected by battle. The effect still applies even if the monster has 0 ATK or DEF. In this case, the monster will lose as much ATK and DEF as it can.
**D. D. Sprite**  
STOR-EN004  
You can Special Summon this card from your hand by removing from play 1 face-up monster you control. If you do, return the removed from play monster to the field during the next Standby Phase.

Special Summoning **D. D. Sprite** does not start a Chain.

Removing 1 of your face-up monsters from play is part of the procedure to Special Summon **D. D. Sprite**. It’s not an effect that targets.

Returning the removed monster from play starts a Chain.

It happens in the very next Standby Phase, not necessarily your next Standby Phase.

If the Special Summon of **D. D. Sprite** is negated, the effect to return the removed monster to the field never activates.

If **D. D. Sprite** is not face-up on the field during the next Standby Phase, the effect to return the removed monster does not activate.

If **D. D. Sprite** is flipped face-down and then face-up again, the effect to return the removed monster will not activate.

If you have no open Monster Card Zones when the effect to return the removed monster resolves, the removed monster is sent to the Graveyard instead.

If **D. D. Sprite**’s effect is being negated by **Forbidden Chalice** or **Skill Drain**, it still activates though it will be negated when it resolves.

If you remove from play an opponent’s monster that you control with **Mind Control**, it is returned to your field during the next Standby Phase and then control of it immediately shifts back to your opponent.

If you remove from play an opponent’s monster that you control due to **Creature Swap**, it is returned to your side of the field during the next Standby Phase and you retain control of it.

If you Special Summon **Plaguespreader Zombie** using its effect and then remove it to Special Summon **D. D. Sprite**, your **Plaguespreader Zombie** will not return during the next Standby Phase since it is considered removed from play by its own effect.

**Top Runner**  
STOR-EN005  
All face-up Synchro Monsters you control gain 600 ATK.

The effects of multiple **Top Runners** are cumulative. (Having 2 results in a 1200 ATK bonus, etc.)

**Barrier Resonator**  
STOR-EN006  
During either player's turn, you can send this card from your hand to the Graveyard to select 1 face-up Tuner monster you control. This turn, that monster cannot be destroyed by battle, and you take no Battle Damage from battles involving it.

You can activate this card at any time during either player’s turn, except for the Damage Step.

Sending this card from your hand to the Graveyard is a cost.
This effect targets your face-up Tuner monster.

The target monster only needs to be a Tuner when this effect is activated. The effect will still apply even if the monster stops being a Tuner before it resolves.

You can target a non-Tuner monster that's being treated as a Tuner by Lightwave Tuning, etc.

If the targeted monster stops being face-up on the field, Barrier Resonator’s effect will no longer apply to it.

Barrier Resonator’s effect will still apply even if your opponent takes control of the monster it’s being applied to. In this case, your opponent would not take Battle Damage from battles involving the protected monster.

Blackwing – Boreas the Sharp
STOR-EN007
You can remove from play this card from the Graveyard to select 1 face-up "Blackwing" monster you control. If that monster attacks this turn, you take no Battle Damage from that battle, it is not destroyed by that battle, and you destroy the opponent's monster that it battled, after damage calculation.

Removing this card from play is a cost.

The effect targets 1 face-up “Blackwing” monster you control.

You can only activate this effect during your Main Phase 1.

The conditions placed by this effect are all placed as part of the resolution of this effect. None of them start a Chain when they're applied.

If the monster targeted by this effect attacks a monster with a lower ATK, that monster is considered to be destroyed by the effect placed by Boreas, not by battle.

If the monster targeted by this effect can attack twice in one turn, the effects placed by Boreas apply to both attacks.

If the monster targeted by this effect is flipped face-down, the effect is no longer applied.

You cannot target a monster that’s already being affected by Blackwing – Boreas the Sharp with the effect of another Boreas.

Blackwing – Brisote the Tailwind
STOR-EN008
If 2 or more face-up “Blackwing” monsters you control are destroyed in the same turn, you can Special Summon this card from your hand. If this card is sent to the Graveyard as a Synchro Material Monster, you gain 600 Life Points.

You can only Special Summon this card with its effect during your Main Phases.

Special Summoning this card with its effect does not start a Chain.

If the conditions are met, you can Special Summon multiple copies of Brisote during the same turn.

It doesn’t matter if your “Blackwing” monsters are destroyed by battle, card effects, or both. As long as 2 or more face-up “Blackwing” monsters were destroyed, you can Special Summon this card.
It doesn’t matter which player destroys the face-up “Blackwing” monsters. As long as 2 or more were destroyed, you can Special Summon this card.

You don’t need to have this card in your hand when the monsters are destroyed in order to Special Summon it. If you draw it later in the turn due to Allure of Darkness you can still Special Summon it as long as 2 or more of your face-up “Blackwing” monsters were destroyed.

Blackwing – Calima the Haze
STOR-EN009
During your opponent’s Battle Phase, if you control no monsters, you can remove from play this card from the Graveyard to select 1 Synchro Monster in your Graveyard, and Special Summon it. It is removed from play at the end of the Battle Phase.

Removing from play this card is a cost.
This effect targets the Synchro Monster.
You can’t target monsters that weren’t properly Synchro Summoned.
You cannot activate this effect during the Damage Step.
If you have multiple copies of Blackwing – Calima the Haze in your Graveyard you can activate all of their effects in a Chain.
If the monster Summoned by this effect isn’t face-up on the field at the end of the Battle Phase, it will not be removed from play.

Tanngrisnir of the Nordic Beasts
STOR-EN010
When this card is destroyed by battle and sent to the Graveyard, Special Summon 2 “Nordic Beast Tokens” (Beast-Type/EARTH/Level 3/ATK 0/DEF 0).

This effect activates even if you don’t have enough open Monster Card Zones. If you don’t have enough open Monster Card Zones when it resolves, you don’t Special Summon any Tokens.

You can Chain the effect of Tanngrjostr of the Nordic Beasts to this card’s effect.

Guldfaxe of the Nordic Beasts
STOR-EN011
If your opponent controls a face-up Synchro Monster and you control no monsters, you can Special Summon this card from your hand.

Special Summoning this card has no effect type and does not start a Chain.

Garmr of the Nordic Beasts
STOR-EN012
If this card battles a Level 4 or lower monster, you can return that monster to the hand after damage calculation.

This effect does not target.
This effect can be activated if Garmr would be destroyed by battle.
This effect cannot be activated if Garmr would destroy the opposing monster by battle.

This effect activates immediately after damage calculation, after Battle Damage is inflicted, but before Flip Effects are activated. Flip Effects still activate and resolve normally afterward.

If Garmr battles due to Mutant Mindmaster or Dark Spirit of the Silent, its effect still activates.

Tanngnjostr of the Nordic Beasts
STOR-EN013
When a monster you control is destroyed by battle and sent to your Graveyard, you can Special Summon this card from your hand. Once per turn, when this Defense Position card on the field is changed to face-up Attack Position, you can Special Summon 1 "Nordic Beast" monster from your Deck in face-up Defense Position, except "Tanngnjostr of the Nordic Beasts".

The effect to Special Summon this card from your hand can be activated during either player’s turn.

It activates during the Damage Step.

You can activate this effect even if Tanngnjostr is added to your hand during the Damage Step, as long as it’s in your hand before your monster is sent to the Graveyard.

If you have multiple copies of Tanngnjostr in your hand, you can only Special Summon one of them when your monster is destroyed by battle and sent to the Graveyard.

You can Chain the effect to Special Summon this card to the effect of cards like Giant Rat.

The effect to Special Summon 1 “Nordic Beast” monster from your Deck can be activated during either player’s turn, including during the Damage Step.

It can be activated when Tanngnjostr is changed from face-down Defense Position to face-up Attack Position.

It can be activated when changed to Attack Position due to a manual position change or a position change by card effect.

Ljosalf of the Nordic Alfar
STOR-EN014
When this card is Normal Summoned, you can select 1 face-up monster you control, except this card. Special Summon 1 “Nordic” monster from your hand with a Level less than or equal to the selected monster’s Level.

This effect targets the face-up monster you control.

You refer to the target’s current Level on the field when this effect resolves.

If the target is no longer face-up on the field when this effect resolves, you don’t Special Summon a monster.

If your opponent takes control of the target before this effect resolves, you still Special Summon a monster.

You refer to the current Level of the monster in your hand when you resolve this effect, including all modifications from cards like Cost Down.

If there is no longer a monster in your hand that you can Special Summon when this effect resolves, your opponent may briefly verify that this is the case.
Svartalf of the Nordic Alfar
STOR-EN015
When this card is Normal Summoned, you can select 1 “Nordic” monster in your Graveyard, and add it to your hand.

This Trigger effect targets 1 “Nordic” monster in your Graveyard.

Dverg of the Nordic Alfar
STOR-EN016
During the turn this card is Normal Summoned, you can Normal Summon 1 “Nordic” monster in addition to your Normal Summon or Set. (You can only gain this effect once per turn.) When this face-up card on the field is sent to the Graveyard, select 1 “Nordic Relic” card in your Graveyard, and add it to your hand.

The Normal Summon you gain from this effect must be a Summon in Attack Position. You cannot Set.

Dverg must be face-up on the field when you attempt the extra Summon.

If Dverg’s effect is being negated, you cannot Normal Summon the extra monster.

You cannot gain more than 1 extra Summon from Dverg of the Nordic Alfar, even if you Summon another Dverg with the extra Summon granted by the first one.

If you activate Double Summon while you’re able to Summon an extra monster due to Dverg’s effect, you still gain the effect of Double Summon. Make sure to clarify which extra Summon you’re using if this happens.

You cannot Normal Summon an extra monster with Dverg’s effect if you Normal Summon Dverg during your opponent’s turn with Ultimate Offering, but if your opponent gains control of Dverg afterwards, he can perform the extra Summon.

If Dverg is Normal Summoned, then flipped face-down and face-up in the same turn, you can still Summon an extra monster.

The effect to add a “Nordic Relic” to your hand targets.

If this card is attacked while face-down and destroyed, you cannot add a “Nordic Relic” to your hand.

If Dverg is flipped face-up by Acid Trap Hole and destroyed, you can add a “Nordic Relic” to your hand.

Valkyrie of the Nordic Ascendant
STOR-EN017
When this card is Normal Summoned, if your opponent controls a monster and you control no other cards, you can remove from play 2 “Nordic” monsters from your hand to Special Summon 2 “Einherjar Tokens” (Warrior-Type/EARTH/Level 4/ATK 1000/DEF 1000) in Defense Position.

Removing from play 2 “Nordic” monsters is a cost.

Controlling no other cards is only a condition to activate the effect. You can still Special Summon even if you control another card when the effect resolves.

You still Special Summon the Tokens even if Valkyrie is no longer face-up on the field when her effect resolves.
**Mimir of the Nordic Ascendant**

STOR-EN018

Once per turn, at the start of your Standby Phase, if you control a face-up "Nordic" monster, you can send 1 Spell Card from your hand to the Graveyard to Special Summon this card from your Graveyard.

If you have multiple copies of this card in your Graveyard, you can’t activate the effects of any more than one because it’s no longer the start of your Standby Phase after the first one resolves.

If you don’t control a “Nordic” monster when this effect resolves, you still Special Summon Mimir.

Sending 1 Spell Card to the Graveyard is a cost.

This effect does not target.

**Tyr of the Nordic Champions**

STOR-EN019

Your opponent cannot select a "Nordic" monster as an attack target, except "Tyr of the Nordic Champions". If there is no other face-up "Nordic" monster on the field, destroy this card.

If you don’t control another “Nordic” monster, but your opponent does, Tyr will not destroy himself.

**Skill Drain** will negate the effect that destroys this card.

The effect that destroys Tyr is Continuous, and will apply as soon as there are no other face-up “Nordic” monsters.

If you control Tyr and another “Nordic” monster that’s equipped with **Raregold Armor**, your opponent cannot attack except with a monster that can attack directly.

If you control Tyr and a “Nordic” monster equipped with **Ring of Magnetism**, your opponent will choose Tyr as an attack target, but then the target changes to the monster equipped with **Ring of Magnetism**.

**Legendary Six Samurai – Kizan**

STOR-EN020

If you control a face-up "Six Samurai" monster other than "Legendary Six Samurai - Kizan", you can Special Summon this card from your hand. While you control 2 or more other face-up "Six Samurai" monsters, this card gains 300 ATK and DEF.

“Legendary Six Samurai” monsters are also “Six Samurai” monsters.

The effect to Special Summon this card has no type and does not start a Chain.

You can’t Special Summon this card if the only “Six Samurai” monster you control is being treated as an Equip Spell.

**Legendary Six Samurai – Enishi**

STOR-EN021

During either player’s turn, if you control another face-up “Six Samurai” monster with a different name, you can remove from play 2 “Six Samurai” monsters from your Graveyard to select 1 face-up monster on the field, and return it to the hand. You can only use this effect once per turn. While you control 2 or more face-up “Six Samurai” monsters that are not "Legendary Six Samurai - Enishi", this card gains 500 ATK and DEF.
Returning 1 face-up monster to the hand is a Quick Effect. It cannot be used during the Damage Step. Removing 2 “Six Samurai” monsters in your Graveyard from play is a cost.

It targets 1 face-up monster.

It can target itself.

It can target a Token, Fusion Monster, or Synchro Monster as well.

If Enishi is no longer face-up on your side of the field when the effect to return a monster is resolved, the monster is still returned to its owner’s hand.

If you don’t have any other “Six Samurai” monsters face-up on your side of the field when the effect to return a monster is resolved, the monster is not returned to its owner’s hand.

**Legendary Six Samurai – Shinai**  
*STOR-EN023*

*If you control a face-up "Legendary Six Samurai - Mizuho", you can Special Summon this card from your hand. If this card is Tributed, select 1 "Six Samurai" monster in your Graveyard, and add it to your hand, except "Legendary Six Samurai - Shinai".*

The effect to Special Summon this card has no type and does not start a Chain.

The effect to add 1 “Six Samurai” monster to your hand targets and starts a Chain.

The effect to add 1 “Six Samurai” monster to your hand is mandatory and will activate even if this card is Tributed to pay a cost or for a Tribute Summon.

This effect activates even if your opponent Tributes your Shinai. The original owner of this card is the one who activates the effect, regardless of who actually Tributes Shinai.

If Shinai is Tributed during the Damage Step by **Summoner of Illusions**, the effect to add 1 “Six Samurai” monster to your hand activates and resolves after **Summoner of Illusions** resolves.

**Legendary Six Samurai – Mizuho**  
*STOR-EN024*

*If you control a face-up "Legendary Six Samurai - Shinai", you can Special Summon this card from your hand. Once per turn, you can Tribute another "Six Samurai" monster to select and destroy 1 card on the field.*

The effect to Special Summon this card has no type and does not start a Chain.

The effect to destroy 1 card targets that card. It is an Ignition Effect.

Tributing another “Six Samurai” monster is a cost.

**Kagemusha of the Six Samurai**  
*STOR-EN025*

*When (exactly) 1 face-up "Six Samurai" monster you control is targeted by a Spell Card, Trap Card, Spell/Trap effect, or Effect Monster’s effect, you can change the target to this face-up card on the field, instead.*

You cannot activate this effect during the Damage Step.

You can activate this effect multiple times during the same Chain.
This effect does not target.

Exactly 1 face-up “Six Samurai” monster must be the only target of the effect if you want to switch the target to this card.

If Kagemusha is an illegal target for the effect you want to switch the target of when that effect is activated, you cannot activate Kagemusha’s effect.

If Kagemusha becomes an illegal target for the effect you’re switching the target of when that effect resolves, you do not switch the target.

If the target “Six Samurai” monster is an illegal target for the effect you’re switching when that effect resolves, the target is still changed to Kagemusha.

**Shien’s Squire**

STOR-EN026

If a “Six Samurai” monster you control battles, during damage calculation you can send this card from your hand to the Graveyard. That "Six Samurai" monster cannot be destroyed by battle this turn.

This effect does not target.

You can use this effect on a “Six Samurai” monster that was attacked while face-down and flipped face-up as a result.

**Karakuri Watchdog mdl 313 “Saizan”**

STOR-EN027

This card must attack if able. When this face-up card is selected as an attack target, change its battle position. When you take Battle Damage from a battle involving this card, all face-up “Karakuri” monsters you control gain 800 ATK and DEF until the End Phase. While this card is in face-up Attack Position, it cannot be destroyed by battle.

The effect to change this card’s battle position when selected as an attack target starts a Chain.

If **Book of Moon** is Chained to the effect to change this card’s battle position, it will change from face-down Defense Position to face-up Attack Position.

The effect to gain ATK and DEF is a Trigger Effect and starts a Chain.

The effect to gain ATK and DEF activates even if this card is destroyed by the battle you take damage from.

**Karakuri Ninja mdl 919 “Kuick”**

STOR-EN028

This card must attack if able. When this face-up card is selected as an attack target, change its battle position. When this card destroys an opponent's monster by battle and sends it to the Graveyard, select 1 Level 4 or lower “Karakuri” monster in your Graveyard, and Special Summon it in face-up Defense Position.

The effect to change this card's battle position when selected as an attack target starts a Chain.

The effect to Special Summon 1 “Karakuri” monster targets.

If this card is destroyed in battle, you cannot activate its effect.
**Scrap Worm**
STOR-EN029

*This card can attack your opponent directly. If this card attacks, it is destroyed at the end of the Battle Phase. If this card is destroyed by the effect of a “Scrap” card and sent to the Graveyard, you can select 1 “Scrap” monster in your Graveyard, except “Scrap Worm”, and add it to your hand.*

The effect that destroys this card at the end of the Battle Phase starts a Chain.

If multiple Scrap Worms have attacked, you can activate and resolve their effects separately in any order.

If Scrap Worm attacks while Ancient Forest is active, you resolve the turn player’s effect first and then the opponent’s. If both are controlled by the same player, they can be resolved in any order.

If Scrap Worm attacks but is flipped face-down by the end of the Battle Phase, its effect does not activate.

If Book of Moon is Chained to the effect that destroys Scrap Worm, it is still destroyed.

The effect to add 1 “Scrap” monster to your hand targets and starts a Chain.

If Scrap Worm attacks and Skill Drain applied by the time Scrap Worm’s effect resolves at the end of the Battle Phase, it is not destroyed.

**Scrap Shark**
STOR-EN030

*When an Effect Monster’s effect or a Spell/Trap Card is activated, destroy this face-up card on the field. If this card is destroyed by the effect of a “Scrap” card and sent to the Graveyard, you can send 1 “Scrap” monster from your Deck to the Graveyard.*

The effect to destroy this card does not start a Chain.

It is not applied when the effect of an already face-up Spell or Trap Card is activated or when the effect of a Spell or Trap Card in the Graveyard is activated. (It applies if a Spell or Trap Card is activated.)

It is not applied unless Scrap Shark was face-up at the time the card or Effect Monster’s effect was activated.

It is applied if a monster that is removed from play activates its effect.

If multiple Scrap Sharks are face-up when a Spell/Trap Card or Effect Monster’s effect is activated, both Sharks are destroyed at the same time.

If you activate Creature Swap, Scrap Shark is destroyed after Creature Swap resolves.

Even if a card or monster effect is activated during the Damage Step before damage calculation while Scrap Shark is battling, it is not destroyed until after damage calculation and is considered to be destroyed by its own effect even if it loses the battle.

The effect to send a “Scrap” monster to your Graveyard also activates during the Damage Step.

**Wattberyx**
STOR-EN031

*When this card inflicts Battle Damage to your opponent by a direct attack, discard 1 random card from your opponent’s hand.*

This effect starts a Chain even if your opponent has no cards in hand.
**Wattmold**  
STOR-EN032  
*This card can attack twice during each Battle Phase. If this card attacks a face-down Defense Position monster, you can destroy that monster immediately with this card's effect without flipping it face-up or applying damage calculation.*

The effect to destroy a face-down Defense Position does not target.

It activates immediately at the start of the Damage Step.

If you attack a face-up monster and then activated **Book of Moon**, if the attack target monster is in face-down Defense Position at the start of the Damage Step you can use this card’s effect to destroy it.

**Symphonic Warrior Basses**  
STOR-EN033  
*Once per turn, you can select 1 face-up “Symphonic Warrior” monster on the field. Increase its Level by the number of cards in your hand; this increase lasts until the End Phase. You can remove from play this card from your Graveyard to select 1 face-up “Symphonic Warrior” monster you control, and increase its Level by the number of cards in your hand; this increase lasts until the End Phase.*

Each effect of this card targets.

Removing this card from play is a cost to activate its second effect.

You count the number of cards in your hand when either effect resolves. The Level will not change once the effect is applied.

If a “Symphonic Warrior” monster has its Level reduced by **Cost Down** and then increased by **Symphonic Warrior Basses**, you increase its current Level by the number of cards in your hand, not the original Level.

**Symphonic Warrior Drumss**  
STOR-EN034  
*Once per turn, you can declare 1 Attribute and select 1 face-up “Symphonic Warrior” monster on the field. That monster becomes that Attribute. You can declare 1 Attribute and remove from play this card from your Graveyard to select 1 face-up “Symphonic Warrior” monster you control, and make it that Attribute.*

Each effect of this card targets.

Removing this card from play is a cost to activate its second effect.

The Attribute change from either of this card's effects lasts as long as the target monster is face-up on the field.

**Symphonic Warrior Piaano**  
STOR-EN035  
*Once per turn, you can declare 1 Monster Type and select 1 face-up “Symphonic Warrior” monster on the field. That monster becomes that Monster Type. You can declare 1 Monster Type and remove from play this card from your Graveyard to select 1 face-up “Symphonic Warrior” monster you control, and make it that Monster Type.*

Each effect of this card targets.

Removing this card from play is a cost to activate its second effect.

The Type change from either of this card’s effects lasts as long as the target monster is face-up on the field.
**Majioshaleon**
STOR-EN036

*Your opponent cannot select this card as an attack target while they control any Spell/Trap Cards. During battle between this attacking card and a Defense Position monster whose DEF is lower than the ATK of this card, inflict the difference as Battle Damage to your opponent.*

Even if your opponent controls only Set Spell/Trap Cards, they still cannot choose this card as an attack target.

If your opponent controls an active **Embodiment of Apophis**, it’s still treated as a Trap Card as well as a monster, so they cannot attack this card.

If **Majioshaleon** is your only monster and your opponent controls a Spell or Trap Card, they cannot attack at all, unless they have a monster with an effect that allows it to attack directly.

If **Majioshaleon** is selected as an attack target while its effect is being negated by cards like **Skill Drain**, but the card negating it is destroyed in response, the attack will proceed as normal.

**Yaksha**
STOR-EN037

*This card cannot be Special Summoned. This card returns to its owner’s hand during the End Phase of the turn it is Normal Summoned or flipped face-up. When this card is Normal Summoned or flipped face-up, you can select 1 Spell/Trap Card your opponent controls, and return it to the hand.*

“This card cannot be Special Summoned.” is not an effect.

Returning this card to its owner’s hand is not optional.

The effect to return a Spell/Trap Card targets. You can return face-up or Set cards.

Returning 1 Spell/Trap Card to the hand is optional, but if you activate the effect you must return a card.

**Thor, Lord of the Aesir**
STOR-EN038

1 “Nordic Beast” Tuner + 2 or more non-Tuner monsters

*Once per turn, you can negate the effects of all face-up monsters your opponent controls, until the End Phase. During the End Phase, if this face-up card on the field was destroyed by your opponent’s card (either by battle or by card effect) and sent to the Graveyard this turn, you can remove from play 1 “Nordic Beast” Tuner monster from your Graveyard to Special Summon this card from the Graveyard. When it is Special Summoned by this effect, inflict 800 damage to your opponent.*

None of these effects target.

All of these effects start a Chain.

Negating your opponent’s monster effects is an Ignition Effect. You can only use it during one of your Main Phases.

You cannot activate Thor’s effect to negate effects unless your opponent controls at least one face-up Effect Monster.

If your opponent takes control of Thor in a Chain with his effect to negate the effects of your opponent’s face-up monsters, his effect will be negated.
Thor will still negate the effects of your opponent’s face-up monsters, even if he’s face-down when his effect resolves.

This effect will not negate the effects of monsters that activate in the Graveyard, such as Sangan.

Monsters Summoned after Thor’s effect resolves won’t have their effects negated.

Removing the appropriate Tuner monster is a cost.

Being destroyed “by your opponent’s card” includes card effects and battle.

If an “Aesir” monster is destroyed by a card effect while face-down, or attacked while face-down and destroyed by that battle, you cannot Special Summon it during the End Phase.

If an “Aesir” monster is Special Summoned back from the Graveyard during the End Phase and then destroyed again by Torrential Tribute, you can Special Summon it back to the field again as long as you have the appropriate Tuner monster to remove.

If an “Aesir” monster is destroyed by the opponent while it’s effect is being negated by March Towards Ragnarok you can still Special Summon it from the Graveyard during the End Phase.

The effect to draw a card does NOT activate when a Karakuri monster is changed from face-down Defense Position to face-up Attack Position or vice versa.

If you control multiple copies of this card when a “Karakuri” monster’s battle position changes, the effect’s to draw a card all trigger and form a Chain.

If this card is Synchro Summoned in Attack Position while Level Limit – Area B is active, it is immediately switched to Defense Position and its effects form a Chain. The effect to draw a card is Chain Link 1 because it’s mandatory.
